DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, drawn to a data editing apparatus for reediting edited data composed of a combination of a plurality of partial data extracted from at least one material data, classified in class 386, subclass 52.
 - II. Claims 8-21, drawn to a data editing apparatus for further editing an edited material composed of a plurality of editing target materials recorded on a nonlinear-accessible recording medium, classified in class 345, subclass 723.
2. The inventions are distinct, each from the other because of the following reasons:

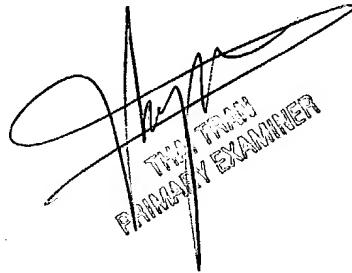

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as editing material recorded on a nonlinear-accessible recording medium changing the value indicating the IN point or the OUT point by finely adjusting the IN point and the OUT point of the editing target material displayed by the display means and recording the changing value on the memory as a new value. See MPEP § 806.05(d).
